## Cito

For the entrance of Netherlands exam institute CITO we designed an impressive light object. A big tree, metaphor for growth and gaining knowledge, changes colour day and night through a LED heartbeat.

For the topfloor - which is one of the highest spots in Arnhem - we designed one of the nicest roof terraces you can imagine.

Her Royal Highness Beatrix of the Netherlands will open the new building Tuesday 29<sup>th</sup> of March.  
Saturday April 2<sup>nd</sup> the building is open to the public: 13.00 – 17.00 hours.
