

INEKEHANS | collection

Ineke Hans runs a studio in Arnhem the Netherlands where she works on mass produced and custom made products, furniture and projects with a nice group of assistants. Some of them also take care of INEKEHANS|collection

iH|c is a studio collection

- iH|c was set up in 1997 in Holland by Ineke Hans as a startingpoint for her studio.
- The collection mainly contains self-initiated furniture and products which she showed in Milan and London during fairs in the early days of her design career.

iH|c is a slow collection

- iH|c only changes or expands when we think something is nice: it is more common that items disappear.
- The collection is only shown at fairs or other presentations when we are in the mood for it or think we have something to say.

iH|c is a basic collection

- All products in INEKEHANS|collection are handmade in The Netherlands and quite a lot in the workshop next to the studio.
- iH|c contains archytypical and functional products. Visually and quality-wise they can last a lifetime.

iH|c is a personal collection

- iH|c is sold internationally, but you will not find it at every corner of the street.
- Architects and outdoor planners use the flexibility of iH|c and adjust to wish and taste.
- When you get in touch, you will find out that we like to think along with you.

iH|c is a classic collection

- Early iH|c products still prove their value today. Many are purchased by leading international museum collections and can be regarded as modern classics.
